**State University of Campinas, Brazil**

Scholarly Contributions [Data Provided by **SCOPUS**]

[Analytical tools to assess the voltage stability of induction-based distributed generators](#)  
(2012) *International Journal of Electrical Power and Energy Systems*, 36 (1), pp. 31-39.

[Dynamic load models for industrial facilities](#)  
(2012) *IEEE Transactions on Power Systems*, 27 (1), art. no. 5978809, pp. 69-80.

[Power imbalance application region method for distributed synchronous generator anti-islanding protection design and evaluation](#)  
(2011) *Electric Power Systems Research*, 81 (10), pp. 1952-1960.

[Practical power quality charts for motor starting assessment](#)  
(2011) *IEEE Transactions on Power Delivery*, 26 (2), art. no. 5738439, pp. 799-808.

[Dynamic non-detection zones of positive feedback anti-islanding methods for inverter-based distributed generators](#)  
(2011) *IEEE Transactions on Power Delivery*, 26 (2), art. no. 5738438, pp. 1145-1155.

[Method for determining the maximum allowable penetration level of distributed generation without steady-state voltage violations](#)  
(2010) *IET Generation, Transmission and Distribution*, 4 (4), art. no. IGTDAW000004000004000495000001, pp. 495-508.

[An investigation on the selection of filter topologies for passive filter applications](#)  
(2009) *IEEE Transactions on Power Delivery*, 24 (3), pp. 1710-1718.

[Influence of voltage positive feedback anti-islanding scheme on inverter-based distributed generator stability](#)  
(2009) *IEEE Transactions on Power Delivery*, 24 (2), pp. 972-973.

[Investigation of positive feedback anti-islanding control for multiple inverter-based distributed generators](#)  
(2009) *IEEE Transactions on Power Systems*, 24 (2), pp. 785-795.

[An analytical approach to determine the optimal resistance for the three-series-resistor method for induction generator connection](#)  
(2008) *IEEE Transactions on Energy Conversion*, 23 (4), pp. 1111-1113.

[Impact of positive-feedback anti-islanding methods on small-signal stability of inverter-based distributed generation](#)  
(2008) *IEEE Transactions on Energy Conversion*, 23 (3), pp. 923-931.

[A practical method to define two adjustments to relays based on frequency measurements used for detecting the islanding of distributed generation](#)  
(2008) *Controle y Automacao*, 19 (2), pp. 199-213.

[An investigation on the nondetection zones of synchronous distributed generation anti-islanding protection](#)  
(2008) *IEEE Transactions on Power Delivery*, 23 (2), pp. 593-600.

[An analytical method for analysis of large-disturbance stability of induction generators](#)  
(2007) *IEEE Transactions on Power Systems*, 22 (4), pp. 1861-1869.

**Editorial**

(2007) *International Journal of Energy Technology and Policy*, 5 (4), pp. 391-392.

Mathematical optimisation techniques applied to power system operation and planning  
(2007) *International Journal of Energy Technology and Policy*, 5 (4), pp. 393-403.

Impact of DG interface controls on the Sandia frequency shift antiislanding method  
(2007) *IEEE Transactions on Energy Conversion*, 22 (3), pp. 792-794.

Policy and economic issues of electrical power and energy systems  
(2007) *International Journal of Global Energy Issues*, 27 (3), pp. 253-261.

International Journal of Global Energy Issues: Editorial  
(2007) *International Journal of Global Energy Issues*, 27 (3), pp. 251-252.

Characteristics of voltage relays for embedded synchronous generators protection  
(2007) *IET Generation, Transmission and Distribution*, 1 (3), pp. 484-491.

Characteristics of vector surge relays for distributed synchronous generator protection  
(2007) *Electric Power Systems Research*, 77 (2), pp. 170-180.

Efficient coordination of ROCOF and frequency relays for distributed generation protection by using the application region  
(2006) *IEEE Transactions on Power Delivery*, 21 (4), pp. 1878-1884.

Performance of frequency relays for distributed generation protection  
(2006) *IEEE Transactions on Power Delivery*, 21 (3), pp. 1120-1127.

Formulas for predicting the dynamic performance of ROCOF relays for embedded generation applications  
(2006) *IEE Proceedings: Generation, Transmission and Distribution*, 153 (4), pp. 399-406.

Comparative analysis between synchronous and induction machines for distributed generation applications  
(2006) *IEEE Transactions on Power Systems*, 21 (1), pp. 301-311.

Issues related to wind energy conversion systems  
(2005) *International Journal of Energy Technology and Policy*, 3 (4), pp. 313-323.

Editorial  
(2005) *International Journal of Energy Technology and Policy*, 3 (4), pp. 311-312.

Impacts of dynamic reactive power compensation devices on the performance of wind power generators  
(2005) *International Journal of Energy Technology and Policy*, 3 (3), pp. 223-236.

Performance curves of voltage relays for islanding detection of distributed generators  
(2005) *IEEE Transactions on Power Systems*, 20 (3), pp. 1660-1662.

Small-disturbance voltage stability of distribution systems with induction generators  
(2005) *IEEE Transactions on Power Systems*, 20 (3), pp. 1653-1654.

Comparative analysis between synchronous and induction generators with squirrel cage rotor for use in distributed generation  
(2005) *Controle y Automacao*, 16 (3), pp. 332-344.

Influence of excitation system control modes on the allowable penetration level of distributed synchronous generators  
(2005) *IEEE Transactions on Energy Conversion*, 20 (2), pp. 474-480.

Comparative analysis concerning the efficacy of relays based on frequency measurements for detection of islanding of distributed generators

(2005) *Controle y Automacao*, 16 (2), pp. 251-261.

Modeling and dynamic analysis of Distribution Static Synchronous Compensator (DSTATCOM) devices using the SimPowerSystems for use with Matlab/Simulink

(2005) *Controle y Automacao*, 16 (2), pp. 187-199.

Impacts of AC generators and DSTATCOM devices on the dynamic performance of distribution systems

(2005) *IEEE Transactions on Power Delivery*, 20 (2 II), pp. 1493-1501.

Comparative analysis between ROCOF and vector surge relays for distributed generation applications

(2005) *IEEE Transactions on Power Delivery*, 20 (2 II), pp. 1315-1324.

A practical method for assessing the effectiveness of vector surge relays for distributed generation applications

(2005) *IEEE Transactions on Power Delivery*, 20 (1), pp. 57-63.

Improvement of induction generator stability using braking resistors

(2004) *IEEE Transactions on Power Systems*, 19 (2), pp. 1247-1249.

False Operation of Vector Surge Relays

(2004) *IEEE Transactions on Power Delivery*, 19 (1), pp. 436-438.
